

ISO 14001:2004

Facilitation Training Course (EN 02-1)

Target Audience:

The Facilitation course provides the participant with a more in-depth level of knowledge on the requirements of the ISO 9001:2008 standard. This course is an enhancement of the Awareness Training course. Our Facilitation course is designed for the employees who are responsible for developing and implementing a quality management system. Practical application of the standard requirements provides the participant with in-depth knowledge regarding the development, implementation and maintenance of the management system requirements. The facilitation course prepares the participant to understand the requirements for auditing preparation as well as importance of Environmental Management as a cost saving tool. How Environmental management contributes to the day to day business operations through the effective application and management of resources.

Additional Information:

The maximum number of participants for this course is 20 with a minimum of 10

Pre-Requisite:

It is recommended that the participants have either taken the ISO 14001:2004 Awareness training or are already knowledgeable in the ISO 14001:2004 Standard through knowledge gained by experience.

Outcome:

By the successful completion of this course the participant will be able to :

- Relate to and apply the ISO 14001:2004 as a management tool

- Identify the requirements as set by the standard.

- Develop certain documents required by the standard.

- Develop a thorough understanding of the interaction of the various processes as determined by the standard.

- Evaluate certain system requirements through the application of standard elements.

- Understand the processes for implementing the developed processes.
